

Water Soluble Lubricity Additives

Product	Description	Applications
Lubristay Syn 317	Special blend of amine soaps Viscosity Builder Shear thickening Excellent boundary lubrication	Works on Ferrous and non-ferrous metals Synthetic machining fluids Grinding fluids Water-based drawing compounds
Lubristay CL-800	Water soluble EP additive package Good boundary lubrication Contains chlorinated component	Excellent EP additive for synthetic fluids Tank-side additive for soluble oils, semi-synthetic and synthetic fluids
Lubristay NC-900	Multifunctional, water soluble additive based on an Amide of castor oil	Tank-side treatment of soluble oils, semi-synthetic and synthetic cutting fluids Corrosion protection
Lubristay Syn 4000S	Water Soluble Polymeric Ester Excellent lubricity on STEEL and its alloys	Excellent anti-wear additive for synthetic fluids. Good for machining and forming
Lubristay Syn 5000AL	Water Soluble Polymeric Ester Excellent lubricity on ALUMINUM , steel and steel alloys Solid at room Temperature	Excellent lubricity additive for synthetic fluids. Excellent for aluminum machining Good for machining and forming of steel
Lubristay Syn 5040AL	Water Soluble Polymeric Ester Excellent lubricity on ALUMINUM , steel and steel alloys Fluid at room Temperature	Excellent lubricity additive for synthetic fluids. Excellent for aluminum machining Good for machining and forming of steel
